

## INSTALLS/ START-UPS/ RECOMMISIONING

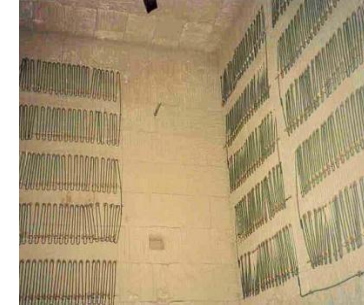

**S&B service technician installing and starting-up a new S&B air heater at our customer's facility.**

We can **install and start-up** new or **recomission** your current equipment. Handling a start-up correctly can make all the difference in the productivity of your combustion system.

*"The S&B technician was quick with the start-up; the speed at which he got our equipment started was remarkable! The tech was friendly, very knowledgeable and his work was outstanding."*

*-Chuck Schiwitz, Semo Milling*

## ENERGY AUDITS/ SYSTEM ALTERATIONS

**Left: Tilt-top furnace, control panel, and new custom built radiant tube burner units. Right: Old electric heat elements.**

From the results of our **energy audits**, we will be able to make suggestions to help your company save energy, and ultimately improve profitability. Whether it is beneficial to implement heat recovery, new control systems, or an electric to gas conversion, we will provide you with a turn-key, energy-efficient system alteration.

*"We've had a 65% utility reduction of the old oven; we have the numbers recorded to prove it!"*

*-Mike Gassaway, CCPI*
