

UPGRADES/ REBUILDS/ RETROFITS/ REPAIRS

Left: Old coating line. Right: New line S&B upgraded, installed & commissioned.

If you have combustion equipment that is in disrepair, out dated or that needs upgrading, we can help. Backed by our engineering department, a team of experienced technicians can **upgrade or rebuild** your combustion equipment to today's codes and standards.

“We had S&B redesign our equipment because it was not as robust as we would have liked. Since, our site has seen a marked improvement in our equipment!”

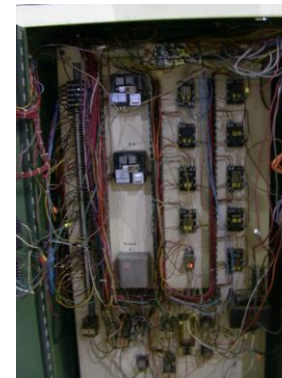

-John Sheely, Western Digital
